1 · Logo and app icon

Solar panel with a thermal hotspot. Logo colors: petrol blue and solar gradient.

Symbol alone: light, dark and monochrome

Icon 1024×1024, 22.5% corners, legible at 48 px

2 · Colors, typography and iconography

Petrol blue · primary
#0B4F6C

Deep blue · dark base
#0F1B2D

Water · accent
#19B5D6

Solar · secondary
#FF8A1F

Sun yellow
#FFC83D

Ice · light background

Do not distort

ThermoScan

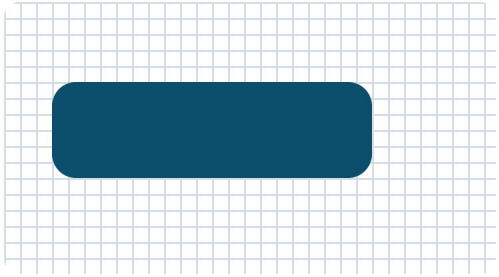

Do not recolor

ThermoScan

Do not add shadows

ThermoScan

Do not use on low-contrast backgrounds

8 px grid

Spacing: 8 · 16 · 24 · 32 · 48 · 64

Radii: 8 (chips), 12 (buttons and fields), 16 (cards)

Minimum touch target: 48 px · screen margin: 24 px

4 · Specification for the clickable prototype

Style reference: Google Health / Fitbit (Material 3 Expressive). This board says what the final mock must include; the screen beside it is just an example.

Style to follow

- **Highlight layer on top:** the main number (total power, hotspots) sits on a petrol layer that tints the status bar and app bar.
- **Sheet of cards:** content rises as a sheet with 28 px top corners and takes over the screen while scrolling.
- **Short bottom bar** with 4 tabs and a pill indicator; each list item in its own container.
- **Large numbers** (Space Grotesk 40–56) with a small unit; clean charts that animate in from left to right.
- **Expressive shapes:** rounded badge with a check for completed cleaning; tonal surfaces, no heavy shadows.
- **Floating period bar** (D · W · M · 3M · Y) on power and history charts; pull down to sync.

Navigation flow

Login → Panels (list) → Panel detail → Selected strip (sheet).
Push → Persistent alert → Panel detail.
Tabs: Panels · Alerts · History · Settings.

Screens to prototype

- **Login:** vertical logo, email, password, sign in, forgot password.
- **Panels (example beside):** total power, search, filter chips, list sorted by severity (hotspot, cleaning, normal) with thermal thumbnail, name, power and status. Each item opens the detail.
- **Panel detail:** top layer with power and max temperature; 2D thermal map in 8 vertical strips; tapping a strip opens a sheet with temperature, last cleaning and “Clean now”; power chart with period selector; recent cleanings.
- **Hotspot alert:** persistent full screen with temperature, strip, cleaning progress, “Acknowledge” and “View thermal map”.
- **Alerts, History, Settings:** alerts grouped by day; cleaning timeline filtered by panel and period; temperature thresholds, notifications and account.

States and rules

- States: online, offline (“No signal for 12 min”), hotspot, cleaning, completed, empty, error and loading (skeleton).
- 24–28 px corners on cards; thermal gradient only on the map and thumbnails; minimum touch target 48 px.
- Status never by color alone: always text and icon; minimum contrast 4.5:1; light and dark modes
